STATE ENGINEER'S OFFICE

Cheyenne

August 12, 1957

Mr. Jack M. Terry
District Engineer
U. S. Geological Survey
Denver Federal Center
Denver, Colorado

Dear Mr. Terry:

You will recall that I discussed with you over the telephone several days ago, the installation of a gaging station on Burnt Fork Creek, tributary of Henry's Fork about where this stream crosses into Wyoming from Utah. This station is needed in connection with administration of water under the Upper Colorado River Compact.

Since talking with you a meeting was held at Burnt Fork, which was attended by George Christopoulos, Deputy State Engineer, and they have requested that I write you and ask that whenever you or someone from your office looks over this area in connection with installing this station, that you notify Emil C. Gradert, Superintendent, Water Division No. 4, Fort Bridger, Wyoming and Clifford Johnson, Assistant Engineer, Utah State Engineer's Office, Salt Lake City, Utah, of the dates.

Since they are familiar with the conditions there, I understand they have some proposals as to the proper location and will be able to assist you in picking out a good location.

Yours very truly,

A handwritten signature in cursive script that reads "Earl Lloyd".

EARL LLOYD
State Engineer
